

# VueOps® SiteLine™

## Your Digital Plan Room

Keep all your facility's information in one place - drawings, schedules, submittals, O&M manuals, models, photos, videos, and more.

# Streamline Your Facility Management Process

Quickly and efficiently investigate data, documents, drawings, and models to solve any problem fast.

By combining the simplicity of 2D with the power of 3D, SiteLine meets your team where they are right now and at every point of your digital transformation journey.

## Find Building Information Faster

With the most powerful facilities search engine available, find the right document – fast! Search by location, asset type, manufacturer, custom tags, and more.

## Bring Context to Building Data through 2D & 3D Visualization

Virtually investigate facility issues in a 2D or 3D Model, and trace upstream and downstream assets to communicate maintenance impacts. View related documents in just one click.

## Streamline Your Investigation

Digital Access to All Building Information - View building systems, not just assets. See all the documents, drawings, and models related to

## Manage Building Changes and Digital As-BUILTs

Update your as-built drawings or link to new drawings to reflect tenant improvements, asset replacements, renovations, and more.

## Keep Facility Occupants Safe

Map Assets and Spaces for documentation, assessment, reporting, emergency response, and other facility management requirements.

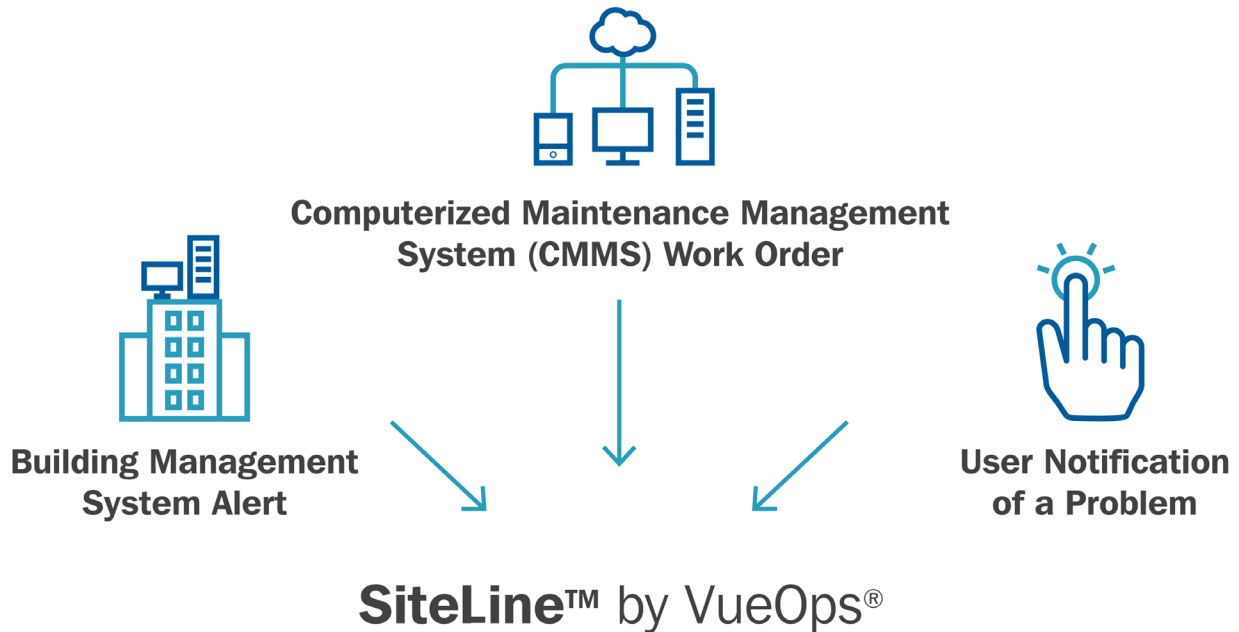

## Access Information Wherever You Are

Desktop and mobile access - Whether you are out in the field or sitting at your desk, VueOps gives you virtual access to critical facility information wherever you are.

## How We Fit

Count on accurate facility asset information from our intuitive digital platform. You'll solve incoming alerts and notifications from your existing Building Management System, Computerized Maintenance Management System (CMMS) work orders, or user notifications effectively and quickly.

## How We Collaborate

Our expert VDC/BIM consultants and extended team support your digital transformation journey by specifying facility data requirements for capital projects and design workflows to collect, validate, transfer, and manage data for use throughout the building lifecycle.
